Sent via email

2nd February 2026

Dear David,

I am writing to follow up on my email of Monday 26 January in which I asked when the hosepipe ban would be lifted for constituents in Mid Sussex. At the time of writing, I am yet to receive a response from your office.

I did however read with interest an email from South East Water to customers sent on Wednesday 28 January, which stated that, *"...it takes longer for groundwater to recover during the winter compared to our surface reservoirs."*

However, the Environment Agency's assessment of ground water levels in Sussex on Friday **30 January** stated that: *"Since 15 January 2026 groundwater has been rising steadily. Groundwater is now higher than average. In all Sussex groundwater communities groundwater is high."*

Please can you explain why the public should believe South East Water's assessment of groundwater levels when they are at odds with the Environment Agency's view?

Finally, I would appreciate confirmation as to when you intend to lift the hosepipe ban at the earliest opportunity.

Yours sincerely,

Alison Bennett
